

# X68 新国度

**One Account. Five AI Districts.**

**AI-powered intelligence across property, stocks, travel, e-commerce & wellness — delivered to every Singaporean.**

 **PropOS**  **Financial**  **NexusTravel**   
**Commerce**  **SerenityOS**

**Confidential — X68 Ventures · 2025**

# Company Purpose

X68 is an AI-powered city-state platform that gives every Singaporean a single account to monitor, alert, and act on opportunities across property, stocks, travel, commerce, and wellness — before the window closes.

- 🤖 **Autonomous AI Agents:** Five specialised AI agents run 24/7
- 📱 **Telegram Delivery:** Signals fire instantly to your phone
- 🔑 **One Account:** \$19/month unlocks all districts

Table 1

| 🤖 Autonomous AI Agents                                               | 📱 Instant Telegram Delivery                                         | 🔑 One Account, All Districts                                     |
|----------------------------------------------------------------------|---------------------------------------------------------------------|------------------------------------------------------------------|
| Five specialised AI agents run 24/7 — no manual monitoring required. | Signals fire directly to your phone before email, before the crowd. | \$19/month unlocks every district — no fragmented subscriptions. |

# **Problem**

**Singaporeans miss opportunities due to information overload.**

- 1. Fragmented tools across platforms**
- 2. Signals arrive too late (hours or days delay)**
- 3. No system-level personalisation**
- 4. High cost: \$200–400/month across tools**

# Solution

**X68 = operating system for financial life**

**PropOS — property alerts**

**Financial — stocks & earnings**

**NexusTravel — flight & hotel deals**

**Commerce — arbitrage gaps**

**SerenityOS — wellness & events**

**Flow: Watchlist → AI scanning → Telegram alert → User action**

How it works:

① Citizen saves watchlist assets per district → ② AI agents scan continuously in background → ③ Signal fires → instant Telegram alert → ④ Citizen acts — execution always theirs

# Why Now

**2018–21: APIs proliferate**

**2022–23: LLM costs collapse**

**2024: Telegram mass adoption**

**2025+: AI-native finance expected**

**X68 combines all five domains into one system — timing is optimal.**

X68 is the first platform to combine all five data domains into a single citizen account — the infrastructure exists, the cost is right, the behaviour has shifted. The window is now.

# Market Size

**TAM: \$8.2B | SAM: \$274M | SOM: \$3.4M**

**Target: 1.2M tech-savvy Singaporeans  
\$228/year average spend**

**Expansion: SG → MY → ID (8× SAM potential)**

# Competition

Bloomberg, SRX, Google Flights, price apps, wellness apps

- X68 advantage:
- Multi-domain intelligence
  - Telegram-native alerts
  - SG-local data
  - Live trading-grade infra

\$19/month all-in-one platform

| Competitor            | Category   | Price/mo | AI Alerts   | Multi-Domain | Telegram | SG-Local |
|-----------------------|------------|----------|-------------|--------------|----------|----------|
| Bloomberg Terminal    | Finance    | \$2,000  | ✓ (partial) | ✗            | ✗        | ✗        |
| SRX Property Alerts   | Property   | \$50     | ✗           | ✗            | ✗        | ✓        |
| Google Flights        | Travel     | Free     | ✓           | ✗            | ✗        | ✗        |
| Price comparison apps | Commerce   | \$0–15   | ✗           | ✗            | ✗        | ✗        |
| Calm / Headspace      | Wellness   | \$12–15  | ✗           | ✗            | ✗        | ✗        |
| X68 (新国度)             | All-in-one | \$19     | ✓✓✓         | ✓            | ✓        | ✓        |

# Competition Out Moats

- **Five-domain data aggregation — each new domain multiplies switching cost**
- **Telegram-native delivery — alert fatigue solved by meeting users where they already are**
- **SG-first localisation — HDB valuation, CPF rate cycles, SG events, local airline routes**
- **Live trading-grade infra (IB Gateway, Hetzner VPS, watchdog auto-restart) already built and running**

# Product

Architecture:  
Data → AI Agents → Telegram → Web App

Live Trading bot , e-commerce monitoring, :  
Live — Trading bot running on real IB paper account  
5 — Districts deployed and operational today  
<3s — Telegram alert latency from signal fire  
99.5% — Uptime via watchdog auto-restart  
100% — Mobile-first, PWA-ready dashboard

Roadmap:  
Q3 payments, Q4 MY launch, Q1 mobile app, Q2 API tier

| Layer           | Stack                                                                   |
|-----------------|-------------------------------------------------------------------------|
| Data Sources    | Yahoo Finance · SRX · Shopee/Lazada · SerenityRadio · IB Gateway (live) |
| AI Alert Engine | Python agents · IBKR Gateway · Serenity API · Kiwi / SerpApi            |
| Delivery Layer  | Telegram bots · Email fallback · Cron-scheduled · Watchdog auto-restart |
| Citizen Web App | Next.js 15 · Supabase Auth · District dashboards · Watchlist config     |

# Business Model

**Free / Citizen \$19 / Enterprise**

- **LTV: \$228/year**
- **CAC: <\$8**
- **Gross margin: 85%**
- **Break-even: Month 18 @ 2,500 citizens**

|                   | Explorer     | Citizen ★                   | Enterprise         |
|-------------------|--------------|-----------------------------|--------------------|
| Price             | Free         | \$19/mo                     | Custom             |
| Alerts            | 3/month      | Unlimited                   | Unlimited          |
| Telegram delivery | ✗            | ✓                           | ✓                  |
| Watchlist         | 5 assets     | Unlimited                   | Unlimited          |
| API calls/day     | 100          | 10,000                      | Unlimited          |
| Nexus Credits     | 50 on signup | +100/month                  | Negotiated         |
| Access            | Read-only    | Full write, all 5 districts | White-label option |

# Business Model

## Unit Economics:

| Metric                 | Value                        |
|------------------------|------------------------------|
| Average Citizen LTV/yr | \$228 (12mo × \$19)          |
| CAC estimate           | <\$8 (organic + referral)    |
| LTV : CAC ratio        | 28× (Year 1 cohort)          |
| Gross margin           | ~85% (infra ~\$4/citizen/mo) |
| Break-even             | Month 18 @ ~2,500 citizens   |

# Team

- **Founder & CEO — TS**  
**Builder, Trader & Full-Stack Engineer**
- **Built live algorithmic trading system (IB Gateway, Python, 4 strategies in production)**
- **Shipped all 5 AI districts from zero: PropOS, Financial, NexusTravel, Commerce, SerenityOS**
- **Full-stack: Next.js, Supabase, Telegram bots, VPS infra, CI/CD on Vercel**
- **Domain expertise: fintech, proptech, e-commerce, travel, wellness AI**
- **Open Roles (post-raise):**
- **Full-Stack Engineer — Mobile app (React Native), district feature velocity**
- **Growth / Community — Telegram community, referral loop, SG influencers**
- **Data Engineer — Real-time pipeline, scanner accuracy, alert quality**
- **Advisor Seats — 2 open (seeking: fintech VC, SG proptech operator)**
- 

**Proof of execution — pre-funding, one founder:**

**5 districts live · Telegram alerts working · Live trading bot in production**

**· VPS infra 99.5% uptime**

**· Supabase auth + RLS deployed**

# Financials
